

## HOW TO SET A TIMER TO TURN THE LED STRIP OFF

1. Open the SMRTLite App and select the device you want to control.

2. If the LED strip is off, turn on the LED Strip by pressing the power button at the bottom of the screen.

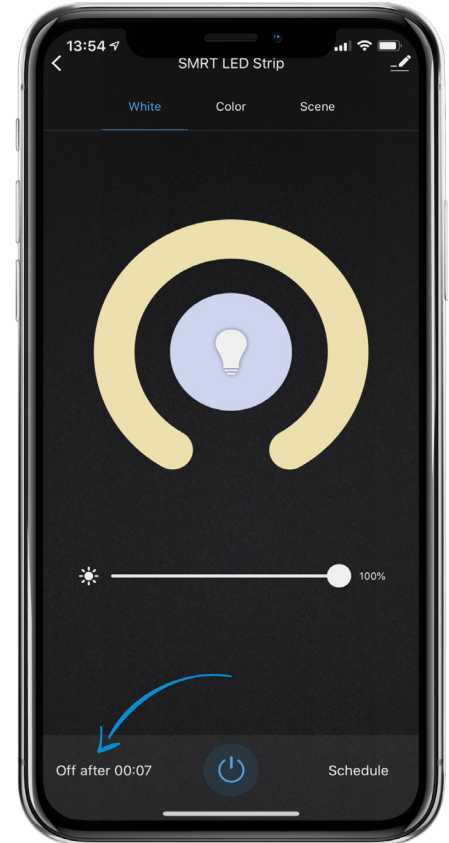

3. To the left of the power button, tap the “Timer” menu item.

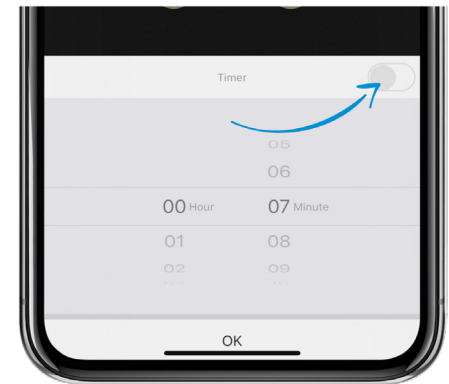

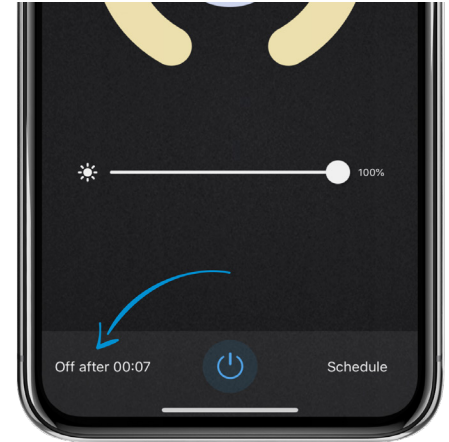

4. From the pop up menu, make sure that the slider on the top right of the menu is green indicating the timer is active.
5. To set how soon the LED strip should turn off based on hours and minutes from the present time, use the two (2) vertical scrollers to set the number of hours and minutes.
6. Once set, tap the “OK” button at the bottom of the screen.

7. Your timer is now set and you will see a countdown in place of the timer menu text to the left of the power button. The countdown will show one minute less than the time you have set as it counts down to 00:00.

8. When the timer expires, the LED strip will turn off.
9. If you decide to turn off the timer before the time is up, tap the timer countdown next to the power button and switch the green slider button to off then tap “OK.”
