

**HOW TO SET YOUR LED STRIP TO
AN RGB COLOR, CONTROL BRIGHTNESS AND SATURATION**

1. Open the SMRTLite App and select the device you want to control.

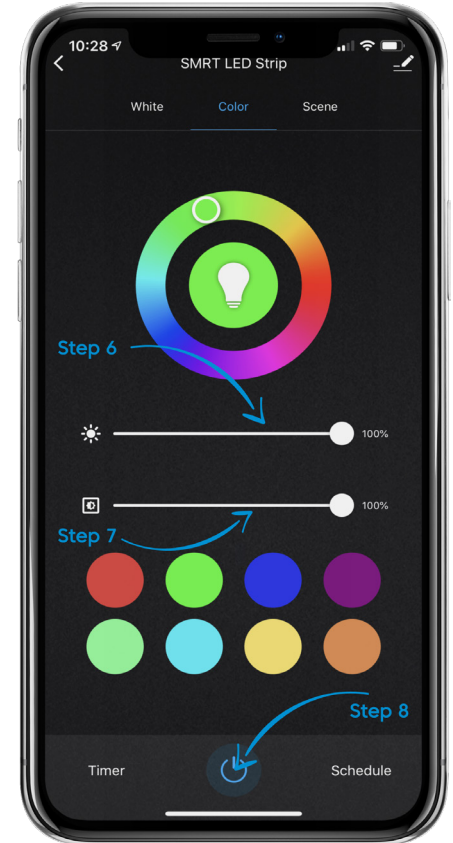

2. If the LED strip is off, turn on the LED Strip by pressing the power button at the bottom of the screen.

3. Select the “Color” menu item at the top of the screen to go to the RGB color controls.
4. Your LED Strip should be lit up with a RGB color.
5. To modify the color, move the small white circle around the color wheel until the desired color is selected or select one of the eight (8) pre-set colors available.

6. To control the brightness, slide the brightness slider left and right to reduce and increase the brightness.
7. To control saturation, you may slide the saturation slider left and right to reduce or increase the saturation.
8. To turn off the LED Strip, simply press the power button at the bottom of the screen.
