

HOW TO SET SIRI TRIGGERS

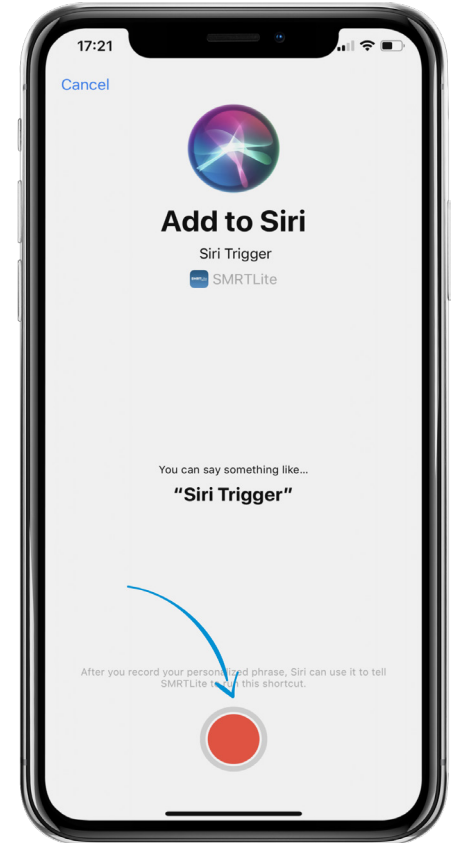

1. Once you create a scenario, iPhone users can set a Siri trigger from the smart scenario screen. Tap on “Add to Siri” at the bottom right of the screen.

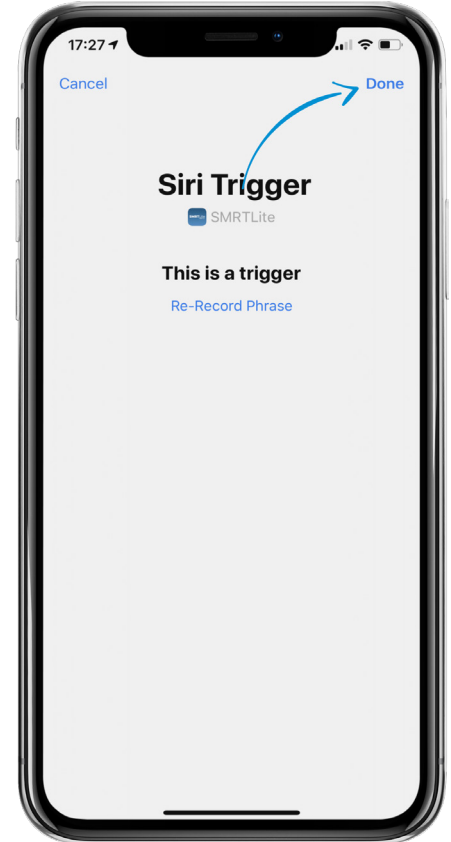

2. Any scenarios you have created will appear here. Find the scenario you would like to create a Siri trigger for and tap “Add to Siri.”

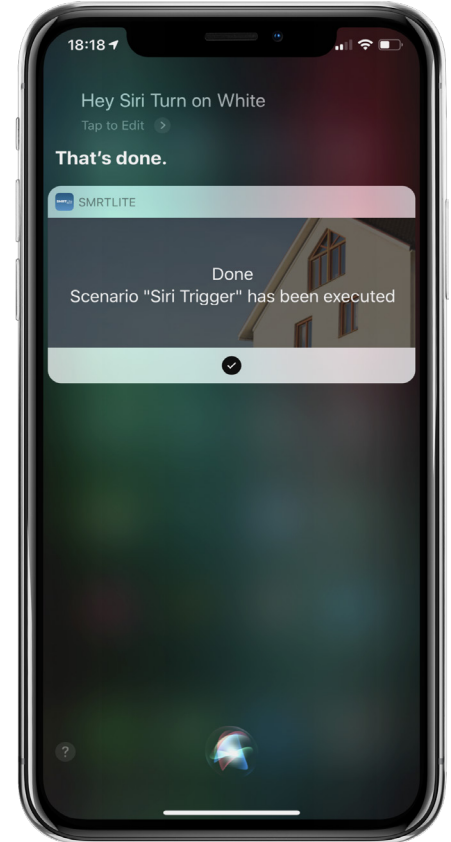

3. Decide what phrase you would like to use to trigger the scenario, press the RED Record button and speak your phrase. When done, tap the Red STOP button.

4. Press “Done” on the top right of the screen to save the phrase to the selected scenario.

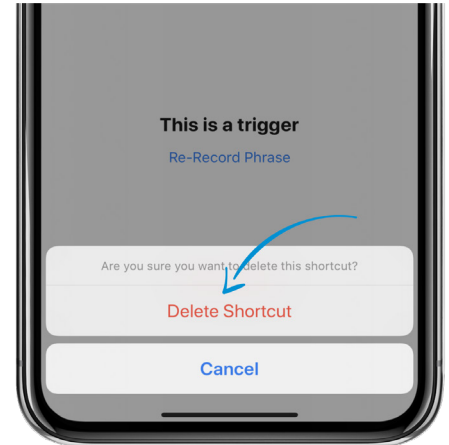

5. To **trigger the scenario** just say “Hey Siri” followed by the phrase recorded for the scenario you would like to trigger. Siri will find the scenario and trigger it automatically.
6. If you want to create more Siri triggers, repeat the above steps.

7. To **delete** a Siri trigger, navigate back to the scenarios page and tap the “Add to Siri” button on the bottom right of the screen.
8. Select the scenario that has the Siri trigger you would like to delete.

9. Select “Delete Shortcut” then tap the “Delete Shortcut” button.
